HARVEST							■	■	■	■		

Growing Instructions:

Sow indoors between January & April.

Sow seeds thinly in pots and cover with a fine layer of compost keeping them in a warm place.

When they have a set of true leaves transplant into 3" pots to grow on. Grow on under cooler conditions and when about 20 cm tall, either plant in the greenhouse or gradually acclimatise them to outdoor conditions.

Stake and trim side shoots as needed. In late summer remove the growing tip to hasten ripening.

Harvest July - October.

An early maturing, indeterminate heirloom variety. Known for producing heavy clusters of bright orange, crack resistant and juicy fruits with a sweet, slighty tangy flavour.
