HARVEST							■	■	■	■		

Growing Instructions:

Sow directly from April to August.

Sow seeds 1-2cm deep in prepared beds or alternatively in deep growing bags or large containers spaced 4-7cm apart.

Grow in a sunny position and keep well watered.

May be ready within seven weeks of sowing.

Harvest June - December.

A highly popular, fast-maturing variety originating from France, prized for their cylindrical shape, blunt rounded tips, and sweet, crisp, virtually coreless flesh. They are excellent for both fresh salads and cooking, and their compact size makes them perfect for container gardening.
