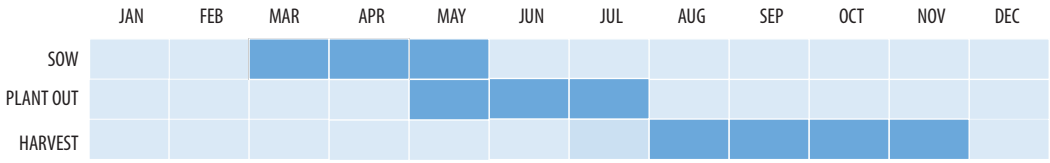
CAULIFLOWER ALL YEAR ROUND

Let's get growing!



Growing Instructions:

Sow indoors between March & May.

Sow seeds thinly into pots and cover with a thin layer of compost, keeping evenly moist.

Transplant seedlings by at least mid-summer, do not let seedling become more that 5 weeks old.

Set plants 45 cm apart in rows 60 cm apart.

Water regularly to prevent bolting.

Harvest August - November.

A classic, hardy dwarf variety ideal for successional sowing. By staggering plantings every few weeks from January to May and again in autumn, you can harvest dense, white heads from spring right through to late autumn.
